

Elite Design Systems (EDS) Completes Year-Long Multi-Media Engagement with Roosevelt Island Operating Company (RIOC)

February 1, 2024 — Elite Design Systems (EDS), a leading technology solutions provider, proudly announces the successful completion of an extensive year-long multi-media project in collaboration with the Roosevelt Island Operating Company (RIOC). This transformative initiative encompassed a wide range of cutting-edge installations and enhancements across Roosevelt Island.

Project Highlights:

WAN/LAN Networking: EDS implemented robust wide area network (WAN) and local area network (LAN) infrastructure to enhance connectivity and communication.

Compass Control Installations & Deployments: Advanced control systems were seamlessly integrated throughout various facilities on the island.

Digital Signage Applications: EDS designed and deployed dynamic digital signage solutions for effective communication and wayfinding.

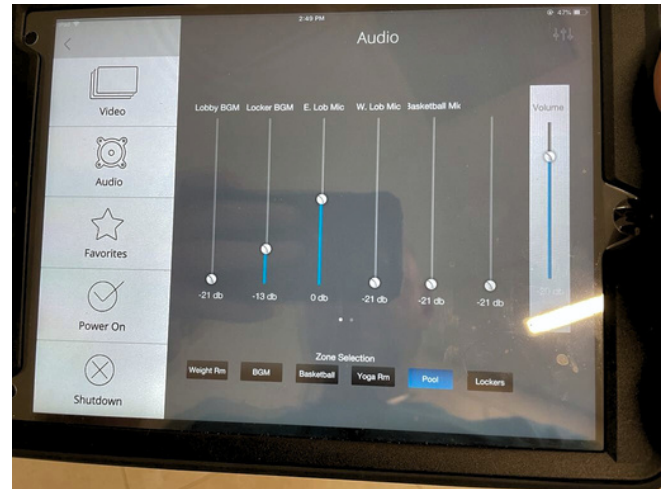

Audio Visual and Hi-End Digital Sound Systems: State-of-the-art audio and visual technologies were installed to elevate user experiences.

Comprehensive Coverage: The project spanned key locations, including the Youth Center, the newly constructed Sports Park Facility, the Roosevelt Island Police Station, the Mosaic Church, and even extended to the iconic Lighthouse and RIOC's Operating Center.

Surveillance Systems: EDS provided comprehensive surveillance coverage across the entire island.

Chris Nace, Roosevelt Island Property Owner: "The renovations and technology improvements have significantly enhanced our day-to-day quality of life on Roosevelt Island. The Sportspark's reopening is a testament to progress and community well-being."

RIOC President Haynes' Statement: "Sportspark is a deeply important part of the Roosevelt Island fabric. Since 1977, the facility has provided the community with a place to exercise, play, gather, and have fun. Over time, it had deteriorated significantly, necessitating a well-capitalized overhaul. The transformation is remarkable, and we invite everyone to experience the state-of-the-art facility at an affordable membership price."

Rick Ortiz, Elite Design Systems Executive: "Our collaboration with the talented IT professionals at RIOC ensured precise deployment tailored to the unique needs of Roosevelt Island. We're proud to contribute to this remarkable transformation."

Our Team Leader "Bobby" Imkhanitsky designed and implemented a technology upgrade that easily integrated with RIOC's existing infrastructure for a seamless transition

About Elite Design Systems (EDS): Elite Design Systems is a technology solutions provider specializing in innovative infrastructure, audio-visual systems, and digital deployments. With a commitment to excellence, EDS transforms spaces and experiences through cutting-edge technology.
